---

- Backward compatible with Professional Grade recorders running Server software v3.71.06 or newer
- Compatible with all analog recorders, except EasyDVR
- Compatible with all NVR recorders, except EasyNVR
- System settings and configurations are retained after installing update

#### EXCLUDES

---

- All "Generation 1" Professional Grade recorders (P/N HDDR - ) and "Generation 2" Professional Grade recorders (P/N HDDR - ), all EasyDVRs and EasyNVRs

#### FIXES/UPDATES

---

- **NEW** 360 Plus dewarping type added for 360° cameras
- **NEW** Support added for saving 360 dewarp view positions when using 360 Plus dewarping type
- **NEW** Digital zoom feature added for E-Series recorders
- **NEW** "Add User Screen" and "Update User Screen" right-click menu functions added to Live
- **IMPROVED** Audio playback in Search
- **IMPROVED** AVI export Quality default set to 100 rather than 50
- **IMPROVED** Right click a channel in Live to start Search now only displays selected channel
- **FIXED** Clearing cameras from Live display no longer expands the site list
- **FIXED** Dewarped 360 view in Search no longer needs to advance a frame in order to export to JPEG
- **FIXED** Zoom in and out of 360 dewarped view correctly centers the view
- **FIXED** Able to dewarp the same camera on multiple channels
- **FIXED** Multiple camera can be set to 360 Plus dewarp type
- **FIXED** Audio playback from Search on Professional Series recorders correctly buffers
- **FIXED** Backup Viewer for Professional Series updated to correct playback issues

#### KNOWN ISSUES

---

- Position settings for Oncam and Vivotek 360° cameras are not preserved on exit. To save your settings, use 360 Plus dewarping method.
- RADIUS drops the frame rate for Oncam 360° cameras during image dewarping
- Oncam dewarping during Search cannot zoom in or out while video is paused
- Server 3.5
  - RADIUS 5.0 is not supported by Server 3.5 or below
  - The oldest supported legacy version of Server software is 3.71.06
  - Legacy Server software users will need to continue using RADIUS 4.07
- Server 5.1
  - Clip Backup is unavailable in versions of RADIUS older than 5.3.1.1600 when using Server 5.1. To resume backup ability, update RADIUS.
