

RELEASE NOTES

OpenEye RADIUS Multi-Site Software v5.3.1.4900

release date 2/7/17

COMPATIBILITY

- Backward compatible with Professional Grade recorders running Server software v3.71.06 or newer
- Compatible with all analog recorders, except EasyDVR
- Compatible with all NVR recorders, except EasyNVR and M-Series
- System settings and configurations are retained after installing update

EXCLUDES

- All "Generation 1" Professional Grade recorders (P/N HDDR -) and "Generation 2" Professional Grade recorders (P/N HDDR -), all EasyDVRs and EasyNVRs

FIXES/UPDATES

- **NEW** Downscaling function added to 360 cameras to improve rendering performance
- **FIXED** Audio playback now works in Backup Viewer
- **FIXED** Network Backup for E-Series recorders now works with Windows 10
- **FIXED** LDAP permissions support improved
- **FIXED** Sometimes playback would begin at 10min index segment
- **FIXED** ONCAM 360 support improved

KNOWN ISSUES

- Position settings for Oncam and Vivotek 360° cameras are not preserved on exit. To save your settings, use 360 Plus dewarping method.
- RADIUS drops the frame rate for Oncam 360° cameras during image dewarping
- Oncam dewarping during Search cannot zoom in or out while video is paused
- Server 3.5
 - RADIUS 5.0 is not supported by Server 3.5 or below
 - The oldest supported legacy version of Server software is 3.71.06
 - Legacy Server software users will need to continue using RADIUS 4.07
- Server 5.1
 - Clip Backup is unavailable in versions of RADIUS older than 5.3.1.1600 when using Server 5.1. To resume backup ability, update RADIUS.
